

HELP US UNDERSTAND MORE ABOUT COVID-19

Our office is participating in a national research survey about the effects of COVID-19.

All chiropractic patients over the age of 18, whether new or life-long are invited to take part.

This information could be important and may help develop an understanding of the impact of COVID-19 on patients under chiropractic care and the relationship between COVID-19, patient characteristics and chiropractic care. This is valuable information as we continue to face this pandemic.

HOW TO PARTICIPATE

To participate, please visit the link below or access the survey with the QR code.
